I am writing to apply for the Marketing Manager, Social Media Content Creation position at the Academy of Television Arts & Sciences. The opportunity to contribute to elevating the digital presence of such a prestigious entertainment organization is genuinely compelling.

Through my work as a full-stack developer, I have developed a strong eye for visual storytelling and content creation. I regularly use Figma to design user interfaces and create engaging visual assets for web applications. This design background, combined with my technical skills in HTML, CSS, and JavaScript, allows me to understand both the creative and technical aspects of producing compelling digital content.

One area that particularly interests me is the role's focus on capturing content at high-profile events and supporting For Your Consideration initiatives. In my professional experience as a Web Developer, I have worked closely with stakeholders to ensure quality control of digital collateral and delivered polished, high-quality outputs under deadline pressure. I am comfortable taking ownership of content production workflows from ideation through final delivery.

In addition to my technical and design experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of contributing to the Television Academy's digital presence.

Sincerely,

Md Shahanur Islam Shagor
