I am writing to apply for the Working Student B2B Operations / Technical Account Management position at idealo internet GmbH. The role sits at the intersection of merchant support, data quality, and technical operations, which aligns well with my technical background and interest in e-commerce.

Through my software engineering studies and hands-on project work, I have developed a strong ability to work with structured data formats and investigate technical issues. I have experience reviewing data feeds, ensuring data quality, and resolving listing-related problems. My technical foundation allows me to quickly understand CSV and XML file structures and contribute to maintaining accurate product data across a platform.

In my previous work as a Web Developer, I supported partners by troubleshooting technical issues, maintaining clear documentation, and collaborating with cross-functional teams. I am comfortable taking ownership of support requests and driving them to resolution independently. I also enjoy working pragmatically to solve challenges and ensure a smooth experience for partners.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently enrolled in a Bachelor of Software Engineering program and will remain enrolled for at least one more year. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the Technical Account Management team at idealo.

Sincerely,

Md Shahanur Islam Shagor
