I am writing to apply for the Global Project Coordinator role at Save the Children International. The opportunity to connect country offices with global headquarters and support high-impact initiatives across Africa, Asia, and the Americas aligns with my experience in coordinating complex, multi-stakeholder projects.

Through my work as a web developer, I have managed end-to-end project delivery involving cross-functional teams, third-party integrations, and remote collaboration across different time zones. I am comfortable coordinating technical and non-technical stakeholders, tracking progress, and ensuring deadlines are met without compromising quality.

One area that particularly interests me is the global mobility aspect of this role. I have experience working remotely with international teams and understand the importance of clear communication, structured documentation, and proactive follow-through when managing projects that span multiple regions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my coordination skills can support Save the Children’s Ambition 2030 goals.

Sincerely,

Md Shahanur Islam Shagor
