I am writing to apply for the Locator position at GrandBridge Energy Inc. Your company's commitment to delivering reliable energy solutions and supporting community infrastructure is something I genuinely respect. I understand this role requires precision, safety awareness, and close coordination with engineering and operations teams.

While my professional background is in software engineering, I have developed strong analytical and problem-solving abilities that transfer well to fieldwork roles. I am comfortable working with technical systems, interpreting data accurately, and following structured procedures to ensure safety and compliance.

In previous work, I collaborated closely with engineering teams, communicated with stakeholders, and maintained a focus on accuracy and reliability. I am confident I can apply the same discipline to locating underground hydro infrastructure and supporting maintenance programs.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to GrandBridge Energy's mission of delivering safe and reliable energy to the community.

Sincerely,

Md Shahanur Islam Shagor
