I am writing to apply for the Analista de Produtos Pleno Open Finance Wallet & Banking Remoto position at PicPay. PicPay's role as a comprehensive financial ecosystem serving millions of active users in Brazil is impressive, and the opportunity to work on the Squad Enabler, which forms the backbone of the Open Finance infrastructure, is particularly compelling.

Through my professional experience in product development, I have managed the full lifecycle of digital products, from discovery through delivery. I have worked on financial platforms that required careful handling of user data, consent flows, and secure connections. My work has consistently focused on creating products that balance business goals with user experience, while operating within complex regulatory and technical environments.

A relevant example is my work on an AI-powered financial application where I was responsible for the complete product cycle. I conducted business analysis to generate strategic insights, tracked product indicators to identify improvement opportunities, and created process flow documentation. I collaborated closely with technology, data, and compliance teams to ensure smooth delivery of features, including authentication systems, payment integrations, and data reception workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my product management experience, analytical mindset, and ability to navigate complex stakeholder landscapes would allow me to contribute meaningfully to the Open Finance team at PicPay. I have attached my CV for your review and welcome the opportunity to discuss how I can support the Squad Enabler's strategic objectives.

Sincerely,

Md Shahanur Islam Shagor
