I am writing to apply for the Job vacancies position at GREEN HILLS CLEANING LIMITED. I understand you are looking for a reliable and capable individual to join your team, and I would like to submit my application for your consideration.

Through my professional experience as a Web Developer, I have built and maintained full-stack web applications using Laravel, Next.js, React, and Node.js. I have worked extensively with MySQL and PostgreSQL databases, created RESTful APIs, and implemented secure authentication and role-based access control systems. My work has involved both frontend and backend development, from responsive UI design to server-side logic and deployment.

In previous roles at Explo-IT and DataSoft LTD, I delivered production-ready applications with real-time features, payment gateway integration, and optimized database performance. I have deployed applications on Linux servers using Docker, Nginx, and CI/CD pipelines. These experiences have given me a solid foundation in building reliable, maintainable software systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
