I am writing to apply for the Investment & Lending Associate position at LBC Mortgage. Your focus on structuring and closing high-value commercial real estate deals across multiple asset classes is impressive, and I appreciate the emphasis on combining analytical rigor with relationship-driven deal execution.

My professional experience has been in full-stack software engineering and AI, where I have designed and developed data-intensive financial platforms. For example, I built an AI-powered financial application that integrates OpenAI, AWS services, and automated PDF term sheet generation. I also developed an AI-powered real estate platform with subscription plans, role-based access, and Stripe payment integration. These projects required strong analytical thinking, data modeling, and the ability to translate complex requirements into working systems.

One area that particularly interests me is the underwriting and financial modeling aspect of this role. In my previous work, I have built systems that process financial data, generate projections, and automate reporting. I am comfortable working with structured data, building models, and presenting recommendations clearly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical and technical background could contribute to LBC Mortgage’s investment and lending operations.

Sincerely,

Md Shahanur Islam Shagor
