I am writing to apply for the Principal Product Manager Acquisition Products role at ButterflyMX. Your mission to automate property access, operations, and security from a single platform is a compelling intersection of real-world infrastructure and intelligent systems. I am drawn to the challenge of owning a product area that serves both a consumer-facing audience and an operator-facing one, especially in a domain where trust, clarity, and conversion are critical.

What stands out to me about this role is the emphasis on AI-driven workflow automation and the builder's mindset. In my work, I have designed and developed systems that connect end-user experiences with administrative backends, integrating third-party platforms, role-based access controls, and real-time data synchronization. I think in terms of user journeys, drop-off points, and what it takes to earn the next step, whether that is a sign-up, a configuration, or a completed transaction.

Through hands-on project development, I have built full-stack applications where I owned the end-to-end experience across multiple user groups. For example, in a multi-vendor e-commerce ecosystem, I architected a system that served customers, sellers, delivery agents, and logistics teams from a single Laravel backend with role-specific Flutter frontends. This required navigating complex integration landscapes, managing data flow across stakeholders, and ensuring that each user group had a clear, trustworthy experience.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in building connected, automation-driven products can contribute to ButterflyMX's acquisition product area.

Sincerely,

Md Shahanur Islam Shagor
