I am writing to apply for the Workshopleiter:in Programmieren position at MINT-Zentrum Hirschaid gGmbH. The idea of guiding young people through hands-on coding projects and helping them build confidence with technology resonates with my own experience as both a developer and a mentor.

Through my professional work as a Web Developer, I have spent over four years building full-stack applications using JavaScript, Node.js, and Git â the same tools mentioned in your requirements. I know these technologies well enough to explain them clearly and help others apply them in real projects.

What stands out to me about this role is the emphasis on practical learning and creative problem-solving. In previous work, I have guided junior developers through debugging sessions, helped them understand core programming concepts, and encouraged them to experiment rather than follow rigid instructions. I believe this approach fits well with your workshop model.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to contribute to your team and help young people discover what they can build with code. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
