I am writing to apply for the HR Payroll Specialist position at LeySelect GmbH. Although my professional background is in software engineering, I bring strong analytical skills, a structured approach to data management, and a proven ability to learn new domains quickly. I am confident these strengths will allow me to contribute effectively to your payroll and HR administration team.

In my previous work as a web developer, I regularly handled complex data processing, database management, and system integrations. These tasks required precision, attention to detail, and the ability to work with large datasets, skills that are directly transferable to payroll administration and data preparation for accounting.

I am accustomed to working with structured data, maintaining accurate records, and ensuring compliance with defined processes. My experience with tools like MySQL and Excel has given me a strong foundation for managing time accounts, leave balances, and personnel files with accuracy and reliability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support LeySelect GmbH. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
