I am writing to apply for the Junior Content Marketing position at FinMent GmbH. Your mission to democratize access to institutional investment strategies through innovative technology is genuinely interesting, and I appreciate the focus on combining financial expertise with modern digital tools.

As a software engineer with experience building full-stack applications, I bring strong analytical thinking and structured problem-solving skills to the table. I am comfortable working with data, identifying patterns, and optimizing processes based on measurable outcomes. These skills translate directly into analyzing campaign KPIs, optimizing funnels, and reporting on performance.

One area that particularly interests me is the use of AI and modern technology to create high-quality content and landing pages. In my development work, I have integrated AI assistants and automated workflows to improve efficiency and output quality. I am confident I can contribute to creating strong creatives and targeted content as part of your interdisciplinary team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical mindset, structured approach, and willingness to take ownership to FinMent. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
