I am writing to apply for the Werkstudent Nachhaltigkeitsdaten Analyse position at Code Gaia. Your focus on sustainability data and software-driven impact aligns with my interest in building systems that serve real-world needs.

Through my software engineering background, I have developed strong skills in data processing, analysis, and automation. I work comfortably with Python, SQL, and various databases including MySQL and PostgreSQL. I am experienced in identifying patterns within datasets and proposing efficient solutions for data handling.

In previous work, I built a real-time server health monitoring dashboard that tracked availability and latency across multiple targets simultaneously. This project required precise data collection, live streaming of metrics, and attention to data quality and accuracy. I also developed automated workflows and scheduled tasks, which directly relates to identifying automation opportunities in data processing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
