I am writing to apply for the Sustainability Account Associate position at Code Gaia. Your mission to automate sustainability management and reporting for SMEs is both timely and impactful, and I am interested in contributing to a platform that helps businesses tackle climate change and social inequality.

My background is in software engineering, but I have consistently worked in roles that require strong customer focus and technical communication. As a Web Developer, I was responsible for onboarding clients onto our platforms, acting as their primary point of contact for questions and issues, and interpreting technical outputs to help them make informed decisions. This experience has prepared me well for the post-sales, customer-facing nature of this role.

A significant part of my work involved being the internal interface between sales teams, engineering, and clients. I developed tools to monitor customer activity and proactively addressed their needs, ensuring they derived maximum value from our products. I am comfortable working independently, managing multiple client relationships, and translating between technical and non-technical stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am motivated to build my expertise in sustainability frameworks like the GHG Protocol and am confident I can quickly learn the domain-specific knowledge required for this role.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in customer management and technical support can contribute to Code Gaia’s growth.

Sincerely,

Md Shahanur Islam Shagor
