I am writing to apply for the Praxissemester Praktikum Fachinformatiker Anwendungsentwicklung position at 360 Consulting GmbH. As a Software Engineering student with practical development experience, I am interested in contributing to your work with Microsoft Dynamics 365 and business application development.

Through my academic and project work, I have built a solid foundation in software development. I have experience with PHP, Laravel, JavaScript, and MySQL, which I have used to develop full-stack web applications. I am comfortable with the full cycle of development: analyzing requirements, designing solutions, writing code, performing unit tests, and managing source code with Git.

One area that particularly interests me is using AI tools to improve development workflows. In my projects, I have integrated AI APIs for features like intelligent assistants and image processing. I am eager to apply this experience to code generation, optimization, and error analysis, as well as automating repetitive processes using low-code or no-code platforms.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a practical internship where I can learn, contribute, and grow as a developer. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
