I am writing to apply for the Werkstudent:in Marketing Operations, Content & Training Materials position at SIMUFORM Search Solutions GmbH. Your focus on intelligent search engines with integrated AI for industrial applications is particularly interesting to me, and I appreciate the opportunity to support your marketing operations while gaining practical experience in a technology-driven B2B environment.

Through my work as a Full-Stack & AI Engineer, I have developed strong technical skills that directly support the responsibilities outlined in this role. I have built and maintained websites and landing pages using modern frameworks like Next.js and React, and I am comfortable with HTML, CSS, and Tailwind CSS for creating clean, responsive interfaces. My experience with content management systems and API integration means I can quickly adapt to platforms like TYPO3 and contribute to website content updates and form management.

One area that particularly interests me is the creation and updating of marketing materials and training documentation. In my previous web development projects, I have been responsible for preparing presentations, documentation, and technical content for diverse audiences. I am skilled at using tools like Figma for visual design and have experience organizing complex information into clear, accessible formats. My attention to detail and structured approach to work align well with your need for high-quality, carefully prepared materials.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support SIMUFORM’s marketing operations and content initiatives.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
