I am writing to express my interest in joining Wenzel DesignTec. As a family-owned business that values trust, reliability, and team spirit, your approach resonates with how I prefer to work: collaboratively, with clear communication, and a focus on delivering quality results.

My background is in full-stack web development, with professional experience building and maintaining applications using Laravel, Next.js, React, and Node.js. Over the past few years, I have worked on projects that required designing RESTful APIs, implementing authentication and role-based access control, integrating payment gateways, and optimizing database performance. I am comfortable working across the stack and enjoy solving problems that require both frontend and backend thinking.

In my most recent role, I developed scalable web applications and collaborated closely with stakeholders to deliver features on time. I also handled deployment on Linux servers using Docker and Nginx, and worked with CI/CD pipelines to keep releases consistent. One project I built independently is a multi-vendor e-commerce ecosystem using Laravel and Flutter, which involved role-based access, real-time notifications, and cloud infrastructure.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
