I am writing to apply for the Software Engineer (m/w/d) position at PANGEA GmbH. The idea of building PangOS â a platform that directly impacts how your teams handle sales, project management, capacity planning, and operations â is exactly the kind of product-driven engineering environment I want to be part of.

My background is in full-stack web development, with strong experience in Laravel, Next.js, React, and Node.js. Over the past four years, I have built and maintained production applications that handle authentication, payment integration, real-time features, and complex database operations. I am comfortable working across the entire stack and enjoy contributing to both backend logic and frontend user experience.

In previous professional work, I developed scalable web applications where I designed RESTful APIs, implemented role-based access control, optimized Eloquent queries and database indexing, and deployed services on Linux servers using Docker and Nginx. I also built real-time communication features using WebSockets and integrated third-party services like payment gateways and cloud storage. These experiences have given me a practical understanding of building robust, maintainable systems that teams rely on daily.

One area that particularly interests me is the emphasis on clean, testable code and sustainable software quality. I have worked with testing tools like PHPUnit and Jest, and I prioritize writing code that is easy to maintain and extend. I also value working closely with stakeholders and bringing ideas into product and architecture discussions â something your description highlights as part of the role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would be glad to discuss how my experience fits with the work you are doing at PANGEA.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
