I am writing to apply for the Architectural Designer Assistant role at Archisearch. The opportunity to contribute to high-end residential and boutique commercial projects in Greece and Cyprus is genuinely interesting to me, and I appreciate the focus on design development, presentation preparation, and AI-assisted workflows.

Although my formal training is in software engineering, I have developed strong design sensibility and visual communication skills through hands-on project work. I am proficient in Figma and have experience creating mood boards, material palettes, and layouts for web and mobile interfaces. My attention to detail and organizational approach have been central to delivering polished, user-focused designs.

In previous work, I have used Photoshop and InDesign to prepare visual assets and presentation materials. I have also worked with 3D modeling and rendering tools, and I am familiar with AI-assisted design workflows, which aligns with your preferred qualifications. I am comfortable working remotely and communicating clearly with cross-functional teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
