I am writing to apply for the Freelance Designer role at La Vena Creativa. Your studio's focus on research-driven design and refined brand identities for B2B and corporate clients aligns well with my approach to building clean, user-centered digital experiences.

Through my work as a full-stack developer, I have designed and implemented responsive interfaces using Figma, Tailwind CSS, and modern JavaScript frameworks. I focus on clarity, usability, and visual consistency, which are essential for logo design, UX work, and presentation materials.

One area that particularly interests me is UX design. In previous projects, I built intuitive dashboards and customer-facing platforms where user flows, layout hierarchy, and visual polish directly impacted engagement. I approach design with the same discipline I apply to code: structured, intentional, and focused on the end user.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I would welcome the opportunity to contribute to your creative projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
