I am writing to apply for the Account Coordinator position at Acast. Your work in building the world's most valuable podcast marketplace, connecting creators, advertisers, and listeners across platforms, is genuinely impressive. I am eager to contribute to a team that supports such a dynamic ecosystem.

Although my professional background is in software engineering, I have developed strong coordination and communication skills through my experience working on complex, multi-stakeholder projects. In my previous roles, I collaborated closely with clients, team members, and cross-functional departments to ensure projects were delivered on time and met quality standards. This required clear communication, careful planning, and a high degree of attention to detail.

I am comfortable working independently and as part of a team, and I am skilled at managing multiple priorities simultaneously. I am proficient with tools like Google Suite and am confident in my ability to quickly learn new systems such as NetSuite. My ability to work effectively with both technical and non-technical stakeholders will allow me to support Acast's account managers and podcasters seamlessly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am genuinely interested in the podcast and media industry and am eager to learn everything about it. I am ready to bring my organizational skills, positive attitude, and eagerness to grow to the Account Coordinator role at Acast. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
