I am writing to apply for the LABORER position at Portales Fire Department. While my background is in software engineering and AI systems, I am eager to bring my strong work ethic, discipline, and problem-solving abilities to this role.

Through my experience as a Web Developer at Explo-IT and DataSoft LTD, I developed a consistent approach to completing tasks efficiently, following instructions carefully, and maintaining high standards of quality. These habits translate well into labor-intensive roles where reliability and attention to detail matter.

I am comfortable working in physically demanding environments and have experience collaborating with teams to meet deadlines. My background in engineering has taught me to approach challenges methodically and adapt quickly to new situations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the Portales Fire Department team.

Sincerely,

Md Shahanur Islam Shagor
