I am writing to express my interest in the Product Manager position at DUˆ´AST. The focus on user-defined quality and customer-driven value resonates with how I approach product development.

Through my work as a Full-Stack & AI Engineer, I have developed a practical understanding of how product decisions impact user experience, system architecture, and business outcomes. I have experience translating customer needs into clear technical requirements, prioritizing features based on impact, and ensuring that what gets built aligns with what users actually value.

In previous professional roles, I collaborated with stakeholders to define product scope, manage development workflows, and deliver features that improved user satisfaction and operational efficiency. I am comfortable working across engineering, design, and business teams to keep product goals aligned.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my product and engineering background can contribute to DUˆ´AST.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
