I am writing to apply for the Staff Housing Caretaker position at Fairmont Hotels & Resorts. The role's focus on maintaining safe, functional, and high-quality living environments aligns with my approach to systems management and operational reliability.

While my professional background is in software engineering, the core competencies required for this roleâ troubleshooting, proactive maintenance, contractor coordination, and detailed record-keepingâ are directly transferable. In my work, I have consistently maintained complex systems, identified potential failures before they occurred, and ensured all components operated at peak performance.

One area that particularly interests me is the preventative maintenance and asset care aspect of this position. In previous roles, I implemented monitoring systems and scheduled inspections to extend the life of critical infrastructure. I am comfortable with hands-on tasks, managing work orders, and maintaining accurate logs to track trends and risks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my reliability, attention to detail, and problem-solving mindset to Fairmont Southampton. I have attached my CV for your review and look forward to the opportunity to contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
