I am writing to apply for the Projektleiter Effizienzhausplanung / Key Account Fertighausbau position at Energie600 - EcoEnergineers GmbH. Your focus on building a new, scalable business area around energy-efficient building concepts and prefabricated house construction is a compelling challenge. I am drawn to the opportunity to not just execute tasks, but to help shape the processes and standards that will define this new department.

My professional background is in software engineering, where I have spent over four years designing and delivering complex web applications. This experience has honed my ability to analyze recurring workflows, identify inefficiencies, and develop structured solutions. I have a strong track record of creating templates, standards, and automated processes that transform ad-hoc project work into reliable, repeatable operations. This systematic approach to building scalable systems is directly transferable to establishing the operational backbone for your Effizienzhaus planning area.

In my previous work as a Web Developer, I was responsible for coordinating with internal teams and external partners to ensure projects were delivered on time and met quality standards. I regularly took the initiative to optimize structures for recurring tasks, developing documentation and shared resources that improved team efficiency. I am comfortable working closely with management to bring ideas forward and contribute to building a small, focused team from the ground up.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to apply my analytical and process-building skills to help you build a reliable, scalable, and technically sound Effizienzhaus planning division. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
