I am writing to apply for the Praktikant:in Psychologie position at GrowInTheRole. Your mission to combine psychological expertise with AI technology for leadership development is genuinely interesting, and I appreciate the focus on creating a scalable, interactive learning experience.

Through hands-on project development, I have built AI-powered systems that integrate large language models with real-world applications. I developed AI assistants using OpenAI's latest models, trained them on custom datasets, and implemented features like voice-to-text processing and automated document generation. This experience has given me practical knowledge of prompt engineering, AI model behavior, and how to design user interactions that feel natural and responsive.

One area that particularly interests me is product development for AI-driven simulations. In previous work, I built an AI-powered real estate platform that used Replicate API for image processing and OpenAI for intelligent property analysis. I also developed a financial application with AI assistants that could understand user queries and provide contextual responses. These projects required testing scenarios, refining prompts, and adapting AI behavior to different contexts, which directly relates to developing and improving your AI-powered roleplay scenarios.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to contribute to GrowInTheRole's product development and marketing efforts while learning from your team's expertise in psychology and leadership development. I have attached my CV for your review and look forward to the possibility of discussing how I can support your goals.

Sincerely,

Md Shahanur Islam Shagor
