I am writing to apply for the Werkstudent CRM & HubSpot position at emerve GmbH. Your approach as a HubSpot Platinum Partner that focuses on enabling clients to use CRM independently rather than just implementing it resonates with me. I am interested in contributing to your B2B projects while deepening my understanding of CRM, marketing automation, and HubSpot consulting.

My background is in software engineering with a focus on full-stack web development. Through my professional experience, I have built and integrated RESTful APIs, implemented authentication and role-based access control, and optimized database queries for performance. These skills translate well to CRM work, where understanding data structures, API integrations, and workflow automation is essential.

One area that particularly interests me is the integration of forms, landing pages, and connected systems to ensure clean data flows. In my previous work, I have developed systems that handle form submissions, manage user data, and connect with third-party services. I am comfortable analyzing requirements, structuring data, and implementing solutions that improve operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently pursuing a Bachelor’s degree in Software Engineering, which complements the technical and analytical aspects of this role. I am eager to learn HubSpot in depth and contribute to your client projects. I have attached my CV for your review and look forward to the possibility of discussing how I can add value to your team.

Sincerely,

Md Shahanur Islam Shagor
