I am writing to apply for the CRM Manager & HubSpot Consultant position at emerve GmbH. Your focus on CRM, marketing automation, and clean B2B processes aligns with my experience in building and integrating systems that connect marketing, sales, and customer service workflows.

Through my professional experience as a Web Developer, I have worked extensively with Laravel and Next.js to build full-stack applications that manage user data, automate workflows, and integrate with third-party services. I have implemented role-based access control, authentication systems, and RESTful APIs that ensure clean data flow between frontend and backend systems. This technical foundation gives me a practical understanding of how CRM systems operate under the hood.

One area that particularly interests me is process optimization and automation. In previous work, I have built systems that automate repetitive tasks, integrate payment gateways, and manage real-time notifications. I have also worked with databases like MySQL and PostgreSQL to structure and query data efficiently. While my direct experience is not with HubSpot specifically, my ability to quickly understand system architectures and data pipelines allows me to adapt to new platforms efficiently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to emerve’s client projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
