I am writing to apply for the Haustechniker Gebˆ́udetechnik position at MY Humancapital GmbH in Munich. While my professional background is in software engineering, I bring a strong technical foundation, a methodical approach to problem-solving, and a proven ability to learn new systems quickly and work independently.

In my previous roles as a web developer, I was responsible for monitoring server health, maintaining system uptime, and troubleshooting technical issues in real time. I developed a real-time server health monitoring dashboard that tracked availability and latency across multiple systems, using Socket.IO to stream live metrics. This experience taught me to work systematically under pressure and to ensure that technical equipment and systems operate reliably.

I am comfortable with digital tools, MS Office, and coordinating with teams to ensure smooth operations. I take ownership of tasks, follow safety and quality standards carefully, and communicate clearly with colleagues and stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my reliability, technical mindset, and service orientation to this role. I have attached my CV for your review and look forward to the opportunity to contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
