I am writing to apply for the Sachbearbeiter Controlling und Finanzen position at MY Humancapital GmbH. While my professional background is in software engineering, I bring strong analytical capabilities, a systematic approach to data management, and a proven ability to maintain accuracy under deadlines.

In my work as a full-stack developer, I have spent years working with structured data systems. I have designed and maintained databases using MySQL and PostgreSQL, where tasks such as data validation, cleaning, and ensuring referential integrity were part of daily operations. This experience has given me a disciplined approach to handling data with precision and care.

One area that particularly interests me is the responsibility of preparing and supporting financial reconciliations and interim closings. In previous projects, I built systems that processed financial transactions, managed user balances, and generated reports. These systems required careful attention to data accuracy, traceability, and documentation, which are directly relevant to the tasks described in this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical mindset and structured approach can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
