I am writing to apply for the Projektleiter Technisches Gebˆudemanagement position in Dresden. While my professional background is in software engineering, I bring strong technical project management experience that aligns with the coordination and delivery responsibilities outlined in this role.

In my work as a Web Developer, I have led multiple full-cycle projects from requirements gathering through planning, execution, and successful deployment. I coordinated with design teams, backend developers, and external service providers to ensure timelines, budgets, and quality standards were consistently met. This experience has given me a structured approach to managing complex technical projects with multiple stakeholders.

One area that particularly interests me is the lifecycle management of technical systems. In my previous roles, I maintained documentation for systems, tracked assets, and supported internal teams throughout the development and maintenance phases. I am comfortable with structured data management and ensuring accurate records are kept for operational continuity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination skills can contribute to your team in Dresden.

Sincerely,

Md Shahanur Islam Shagor
