I am writing to apply for the Vice President Supply Chain position. After reviewing the job description carefully, I recognize that this role requires extensive logistics and supply chain leadership experience that falls outside my professional background.

My expertise is in full-stack software engineering, AI systems, and autonomous technologies. I have built scalable web applications, real-time monitoring systems, and AI-powered platforms, but I do not have the 15+ years of multi-site logistics operations, warehouse management, or supply chain P&L ownership that this position demands.

I believe in being straightforward about qualifications. This role requires a seasoned supply chain executive with deep experience in regulated logistics environments, labor efficiency metrics, and multi-site team leadership. That is not a profile I can honestly claim.

I appreciate you considering my application and wish you success in finding the right leader for this important role.

I've attached my CV for your reference.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
