I am writing to apply for the Asistente de Cuentas Marketing BTL Weldon position at Universia Argentina. The role requires someone who can support BTL activations, coordinate with suppliers, manage promotional communications, and ensure smooth execution of campaigns. While my professional background is in software engineering, I bring strong organizational discipline, coordination experience, and a systematic approach to managing complex workflows.

In my previous professional experience as a Web Developer, I worked closely with stakeholders to understand requirements, coordinate resources, and deliver projects on time. This involved managing budgets for development resources, communicating clearly with both technical and non-technical team members, and ensuring that every deliverable met quality standards before release. These skills translate directly to supporting BTL activations, where coordination with suppliers, implementation oversight, and attention to detail are essential.

One area that particularly interests me is the coordination aspect of this role. Managing promotional mailings, contacting winners, and organizing prize deliveries requires the same structured thinking and follow-through that I apply to software projects. I am comfortable working with multiple moving parts simultaneously and ensuring nothing falls through the cracks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my organizational skills and coordination experience can contribute to the Weldon team at Universia Argentina.

Sincerely,

Md Shahanur Islam Shagor
