I am writing to apply for the Chief Growth Officer role at Berni and Mick Ireland. Your organization's 20-year track record in the digital education sector and global presence across 100+ countries is impressive. I am drawn to the opportunity to contribute to strategic growth while maintaining full operational autonomy.

My professional experience has been shaped by a self-starting approach and a focus on delivering results. As a software engineer, I have consistently taken ownership of complex projects from concept to deployment, working independently and making decisions that balance technical quality with business outcomes. This autonomous mindset aligns with the performance-driven culture you describe.

Throughout my career, I have developed strong problem-solving abilities by building full-stack applications and integrating AI-powered features into production systems. I approach challenges methodically, focusing on implementation and measurable results rather than theoretical planning. My work has required clear communication with stakeholders, team members, and clients across different time zones and cultural backgrounds.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my strategic thinking, communication skills, and results-oriented mindset to Berni and Mick Ireland. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your mission.
