I am writing to apply for the (Junior) Accounting Manager position at Matera GmbH. Your mission to simplify property management for homeowners and your scaling phase in Berlin caught my attention. I am looking for an opportunity where I can combine my analytical mindset with a willingness to learn a new domain from the ground up.

Although my professional background is in software engineering, I have always been comfortable working with numbers, data, and structured systems. In my previous roles, I built and maintained full-stack applications that involved complex data flows, financial transactions, and reporting. This required precision, attention to detail, and the ability to explain technical results clearly to non-technical stakeholders.

I understand that this role does not require prior accounting experience, and I am fully prepared to go through structured training to learn Matera's accounting workflows. I am confident that my analytical thinking, careful work style, and comfort with numbers will allow me to quickly become effective in managing client bookkeeping and transferring results to your platform.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and eagerness to learn can contribute to Matera's continued growth in Germany.

Sincerely,

Md Shahanur Islam Shagor
