I am writing to apply for the School Crossing Patrol position with the Education Authority (Northern Ireland). The role's focus on ensuring the safe passage of school children and supporting the local community aligns with my values of responsibility, service, and attention to detail.

While my background is in software engineering, I have developed strong interpersonal and communication skills through years of working closely with clients, team members, and stakeholders across different projects. I am comfortable following established procedures while also using my own judgment to handle situations effectively. These skills transfer directly to the responsibilities of a School Crossing Patrol, where clear communication, reliability, and the ability to manage children's behaviour safely are essential.

I have experience working with the public in various professional settings, including coordinating with non-technical users and ensuring their needs were met with patience and clarity. I am committed to providing excellent service and maintaining a calm, professional manner in all interactions. I understand the importance of road safety and traffic awareness, and I am fully prepared to undertake the training required for this role.

In addition to my professional experience, I work effectively across diverse teams and communicate clearly with people from different backgrounds. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in multicultural environments. I am also committed to the values of equality and excellence in service delivery that the Education Authority upholds.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the opportunity to contribute to the safety and well-being of children in the Armoy community.

Sincerely,

Md Shahanur Islam Shagor
