I am writing to apply for the Open Position â Dauphine role at AmericaShare. The generalist nature of this position aligns well with my experience as a full-stack and AI engineer who enjoys working across the entire software delivery stack.

Through my professional experience, I have built and maintained scalable web applications using Laravel, Next.js, React, and Node.js. I am comfortable working on both frontend interfaces and backend APIs, integrating authentication, payment gateways, and real-time communication features. My work includes database design with MySQL and PostgreSQL, server deployment with Docker and Nginx, and setting up CI/CD pipelines on Linux environments.

One project that reflects this breadth is a real-time server health monitoring dashboard I developed using React, Node.js, Express, and Socket.IO. The system streams live metrics to the browser, supports role-based access control, and runs in a fully Dockerized production setup. This required working across frontend, backend, real-time data handling, and infrastructure.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to AmericaShare.

COLORFUL RMTU5LjE5OC42Ni4xNjM=

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
