I am writing to apply for the Social Media Manager position at Ipanema UG. Your work in the lifestyle, beauty, and entertainment space, supporting creators and building brand campaigns, is exactly the kind of creative environment I want to contribute to.

My professional experience has been in full-stack development, but I have spent years working closely with digital content platforms, user engagement systems, and the tools that power modern creator workflows. I understand how content is structured, how campaigns are tracked, and how data flows between platforms. This technical perspective allows me to think beyond just posting content and instead design systems and processes that make social media operations more efficient and measurable.

One area that particularly interests me is the intersection of technology and creator management. Through my work building platforms for travel agencies, real estate, and gaming, I have developed a strong sense of how to organize content, manage user interactions, and ensure that campaigns run smoothly from concept to delivery. I am comfortable working with timelines, coordinating multiple moving parts, and maintaining a clear view of details without losing sight of the bigger creative picture.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can take creative responsibility, contribute ideas, and grow with a company. Ipanema UG seems like the right place to do that. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
