I am writing to apply for the Marketing Spezialist position at Griptech GmbH. Your company's focus on innovative attachment systems, weighing solutions, and camera systems for industrial trucks is impressive, and I am drawn to the opportunity to combine technical understanding with creative marketing work.

My background is in full-stack web development, where I have spent over four years building and maintaining websites and web applications. This technical foundation allows me to understand the product side of marketing deeply and to manage digital channels effectively. I am comfortable working with content management systems, creating and updating website content, and ensuring that online presence aligns with brand strategy.

One area that particularly interests me is the Pflege, Aktualisierung und kontinuierliche Weiterentwicklung Ihrer Unternehmenswebsite. In my professional experience as a Web Developer, I have built responsive, SEO-friendly interfaces using Next.js, React, and Tailwind CSS, and have maintained backend systems with Laravel and MySQL. I can directly contribute to keeping your website technically sound, up-to-date, and optimized for search engines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Griptech's marketing growth. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
