I am writing to apply for the E-Commerce / eCom Shopify Onlineshop Manager position at Hommel Hired. The role combines e-commerce operations, conversion optimization, and close collaboration with design and development teams, which aligns with my experience in building and optimizing web platforms.

My professional experience includes developing full-stack web applications using Laravel, Next.js, React, and Node.js. I have worked on projects that required responsive UI implementation, REST API integration, and database management with MySQL. This technical foundation supports the coordination and optimization work central to managing Shopify-based online shops.

One area that particularly interests me is the focus on data-driven improvements and A/B testing to enhance customer experience. In previous work, I collaborated with design and development teams to implement features based on quantitative analysis and user feedback. I am comfortable working with Figma, writing detailed tickets, and ensuring that technical requirements are clearly communicated between teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to the continued growth of your brands.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
