I am writing to express my interest in the Steuerberater (m/w/d) position in Paunzhausen, as advertised by Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in digital workflows, automation, and secure systems that can support a modern, digitally-driven tax firm.

Through my work as a full-stack developer, I have built and maintained complex web applications using Laravel, Next.js, React, and Node.js. I have experience designing RESTful APIs, managing MySQL and PostgreSQL databases, and implementing role-based access control and authentication systems. These skills translate directly to supporting efficient, digital-first processes in a professional services environment.

One area that particularly interests me is the emphasis on digital processes and modern equipment in your partner firm. I have hands-on experience deploying applications on Linux servers using Docker, Nginx, and CI/CD pipelines, and I am comfortable working with cloud platforms like AWS and Google Cloud. I am confident I can contribute to maintaining and improving the digital infrastructure that supports your tax advisory services.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
