I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. While my professional background is in software engineering rather than tax advisory, I bring strong technical skills that align with the digital working style and modern process orientation your partner firm values.

Through my work as a full-stack developer, I have built secure, scalable web applications using Laravel, Next.js, and Node.js. I have experience implementing authentication systems, role-based access control, payment integrations, and real-time features. These skills are directly applicable to supporting digital workflows in a modern tax firm.

One area that particularly interests me is the opportunity to contribute to digital process optimization. I have experience deploying applications on Linux servers with Docker, Nginx, and CI/CD pipelines, and I am comfortable working with cloud infrastructure. I am confident I can help maintain and improve the digital tools your firm relies on.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
