I am writing to express my interest in the Steuerberater position at Taxtalente.de for one of their partner firms in Norderstedt. While my professional background is in software engineering rather than tax consulting, I bring strong analytical capabilities, a methodical approach to complex systems, and a proven ability to work with structured data and digital workflows.

Through my experience as a Web Developer, I have developed a disciplined approach to accuracy, efficiency, and thoroughness. Building full-stack applications required careful attention to detail, systematic problem-solving, and the ability to manage multiple interconnected components simultaneously. These habits translate directly into the precise, compliance-oriented work that tax preparation and review demand.

One area that particularly interests me is the emphasis on digital working methods and modern tools. I have hands-on experience with Linux servers, Docker containers, CI/CD pipelines, and cloud infrastructure. I am comfortable working in technology-driven environments and can quickly adapt to new software platforms used in tax and accounting workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could contribute to your partner firm in Norderstedt.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
