I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de for a partner firm in Kevelaer. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in building secure, scalable digital platforms that support complex workflows and data management.

Through my professional experience as a Web Developer, I have designed and developed full-stack applications using Laravel, Next.js, and Node.js. I have implemented role-based access control, real-time features, and secure authentication systems. I have also worked with MySQL and PostgreSQL databases to manage structured data efficiently. These skills are directly relevant to supporting a digitally-driven tax firm with modern tools and processes.

One area that particularly interests me is the emphasis on digital working methods and modern equipment. I have deployed applications on Linux servers using Docker and Nginx, and I am comfortable working with cloud infrastructure and CI/CD pipelines. I am confident I can contribute to maintaining efficient, secure, and well-organized digital workflows in a tax advisory environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills can support the digital operations of your partner firm in Kevelaer.

Sincerely,

Md Shahanur Islam Shagor
