I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Frankfurt an der Oder. I understand this role requires a certified tax consultant, and while my professional background is in software engineering, I bring strong analytical skills, a systematic approach to complex problem-solving, and genuine openness to digital workflows.

Through my professional experience as a Web Developer, I have designed and built scalable full-stack applications using Laravel, Next.js, React, and Node.js. I have worked extensively with databases like MySQL and PostgreSQL, built RESTful APIs, implemented authentication and role-based access control, and deployed applications on Linux servers with Docker and CI/CD pipelines. This technical foundation makes me highly adaptable to digital tools and modern process automation.

One area that particularly interests me is the emphasis on a digital way of working. I have hands-on experience with cloud platforms (AWS, Google Cloud), server management (Nginx, Apache), monitoring tools (Prometheus, Grafana), and real-time communication systems (Socket.IO). I am comfortable working in environments where technology drives efficiency and accuracy.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills and analytical mindset could contribute to your partner firm’s operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
