I am writing to apply for the Aeronautical Information Service Cadet position at Grenada Airports Authority. This role interests me because it combines structured data management with the operational demands of international air navigation, and I am eager to contribute to the safety and efficiency of aviation operations.

Through my software engineering background, I have developed strong computer literacy and a methodical approach to collecting, verifying, and processing information. I am comfortable working with computer systems, maintaining accurate records, and following established procedures precisely. These skills directly support the responsibilities of collecting aeronautical data, completing flight documentation, and monitoring systems like SPATIA and CADAS.

I have experience handling administrative records, shift logs, and reconciliation documents in previous roles. I understand the importance of accuracy, confidentiality, and responsibility when managing sensitive information. I am also comfortable working shifts, weekends, and public holidays, and I am fully prepared to travel overseas for required training.

In addition to my technical skills, I communicate clearly and work well in team environments. I am fluent in Bengali and English, with working knowledge of Russian and Hindi, which helps me collaborate across diverse teams. I am committed to learning and applying technical aviation procedures to meet ICAO standards.

I am ready to obtain and maintain the required security clearance and provide a clean police record. I have attached my CV for your review and look forward to the opportunity to grow within your organization.

Sincerely,

Md Shahanur Islam Shagor
