I am writing to apply for the Collections Manager position at National Service Bureau. Your focus on Accounts Receivable Management and Subrogation, combined with a team-oriented culture that values accountability and follow-through, is what draws me to this opportunity.

My professional experience has been in software engineering, where I have developed strong analytical and problem-solving skills. I have spent years analyzing complex systems, evaluating performance metrics, and making data-driven recommendations for improvement. This structured approach to analysis and reporting translates directly to evaluating call center KPIs, service metrics, and operational performance.

In previous work, I collaborated closely with cross-functional teams, communicated technical and non-technical information clearly, and consistently delivered results on time. I am comfortable working independently in a remote environment, managing my own schedule, and holding myself accountable to goals. I also have experience training and mentoring team members, which aligns with the continued training and education responsibilities of this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical mindset and commitment to accountability can contribute to the NSB team.

Sincerely,

Md Shahanur Islam Shagor
