I am writing to apply for the Process Specialist role at Betfred. With over 4 years of experience building and optimizing web-based systems, I am confident I can contribute to the operational efficiency and service quality that Betfred values.

My background in full-stack development has given me a strong foundation in process automation and system reliability. I have worked extensively with Laravel, Next.js, and Node.js to build scalable applications, manage databases like MySQL and PostgreSQL, and deploy solutions on Linux servers using Docker and CI/CD pipelines. This technical experience translates directly into improving and streamlining business processes.

In my professional experience at Explo-IT, I was responsible for delivering real-time features, integrating payment gateways, and optimizing application performance through query tuning and caching strategies. I collaborated closely with stakeholders to ensure that technical solutions aligned with business needs, which required clear communication and a focus on practical outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support Betfred’s continued growth.

Sincerely,

Md Shahanur Islam Shagor
