I am writing to apply for the Entry Level Administrative Assistant position at Recruit Lytics Hiring. This role appeals to me because it offers a structured entry point into administrative support and digital operations, areas where I can apply my organizational skills and attention to detail.

Through my software engineering background, I have developed strong computer literacy and a methodical approach to managing data and documentation. I am comfortable working with spreadsheets, tracking systems, and digital files, and I understand the importance of maintaining accurate, well-organized records.

I am self-motivated and able to work independently in a remote environment. I follow instructions carefully, manage repetitive tasks with consistency, and communicate clearly in writing. I am also eager to learn new tools and workflows as part of a supportive team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
