I am writing to apply for the Human Resources Assistant position at Recruit Lytics Hiring. Although my professional background is in software engineering, I am looking to transition into human resources where I can apply my strong organizational abilities, attention to detail, and communication skills to support your HR team.

Through my work as a web developer, I have developed a disciplined approach to managing tasks, maintaining accurate records, and coordinating with multiple stakeholders. I am accustomed to handling sensitive information with discretion and ensuring that processes run smoothly and on schedule.

I am a quick learner who adapts quickly to new systems and workflows. I am confident that my ability to organize, communicate clearly, and work collaboratively will allow me to contribute effectively to recruitment, onboarding, and employee administration.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support Recruit Lytics Hiring’s HR operations. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
