I am writing to apply for the File Clerk position at Recruit Lytics Hiring. The role's focus on maintaining accurate, organized, and compliant digital records aligns with my approach to structured work and attention to detail.

What stands out to me about this position is the emphasis on accuracy, confidentiality, and process consistency. In my previous work as a Web Developer, I regularly managed digital files, applied naming conventions, maintained organized project repositories, and ensured data integrity across multiple systems. These responsibilities required the same discipline and precision that this File Clerk role demands.

Through my development work, I became proficient with cloud storage platforms, spreadsheets, PDF tools, and ticketing systems. I am comfortable working with shared inboxes, converting file formats, performing quality checks, and maintaining audit-ready documentation. I understand the importance of following retention schedules and handling sensitive records with strict access controls.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my organizational skills and attention to detail can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
